## PROJECTS

---

### **Pandemic Preparedness Index (PPI): On the Statistical Multi-dimensional Processes for the Comparative Analysis of the Socio-economic Status among Geopolitical Regions. (Research)**

In this paper, we develop a Composite Indicator that serves as a statistical tool to assess the pandemic preparedness of a region. A large amount of mathematical modeling of the theoretical framework has been done using normalization, imputation, PCA, weighting, and aggregation. The results of index values for Asia, Europe, and the USA are analyzed and visualized. (June'21)

### **An Analytical Study of Fibonacci Sequences and Golden Ratios in the Renaissance Arts. (Research)**

This paper presents an in-depth exposition and analysis of five major High Renaissance arts, namely Salvator Mundi, Creation of Adam, Birth of Venus, Doni Tondo, and The Ambassadors. Using PhiMatrix software, the Golden Sections in the key components of these artistic compositions have been displayed and interpreted, both structurally and exquisitely; Supervised by Prof. Dr. Sachchidananda Pathak, Tribhuvan University (November '21)

### **Interact District 3292 Website**

Collaborated with a junior to develop official website that includes all the required information about the Interact District (July '21)
